

HAMBER UNDERFLOOR SAFES

Hand crafted in the UK by Artisans for almost 60 years, our safes are made from the finest materials, without compromise.

The fully-concealed alternative to a conspicuous and easily noticed traditional floor standing safe.

Substantial and exceptionally robust, simply operated with just one hand and installed out of sight under reinforced concrete. Hamber underfloor safes are designed and engineered to resist the most severe criminal attack. The ultimate protection for your most precious possessions.

OUR RANGE

MINDER

Our all time best selling underfloor safe, fitted with a VdS grade 2 lock. The choice of thousands of customers over almost 60 years.

*Photo shows optional quick-drop 'deposit tube' (available in all ranges).

CARETAKER

With its large square door, and VdS grade 2 lock, the Caretaker is ideal for the storage of bigger items.

DREADNOUGHT ABP

Our class-leading flagship underfloor safe incorporates 'ABP' protection to resist attack from flame cutting equipment. It also features a superior VdS Grade 3 lock.

*All safes are supplied with a connecting underfloor neck section and floor level dust cover, not shown above.

Hamber underfloor safes are virtually invisible when correctly installed, providing the advantages of strength and concealment. Fitted with superior 'VdS' grade 2 and 3 insurance approved locks and incorporating many innovative measures to resist attack, they represent the smartest way to secure the most important things in your life. Complete peace of mind, for a fraction of the potential cost of a burglary.

PURCHASE WITH CONFIDENCE

Purchase on-line or arrange a confidential consultation and demonstration at our private Essex showroom. After experiencing the exceptional hand-built quality of our range in person, you can then purchase and collect a stock safe same day, paying by BACS, card or cash.

Various key and combination door locking options available, with vaults sized from 8 to 42 litre capacity. Full installation instructions provided for you, or your handyman builder (for new build or retrofit in almost all types of existing floor).

Hamber underfloor safes, the choice of those whose first priority is maximum security, not minimum cost.
